**List of Randomly Selected Public and Private Elementary Schools for Distribution of H1N1
Intranasal Mist Flu Vaccine for In-School Vaccination Clinics**

As many of you have likely heard by now, the pandemic H1N1 flu vaccine is currently being distributed to communities across the country. At this time the quantity of H1N1 flu vaccine being received is very limited and only in the intranasal mist form. However, the FCHD anticipates having significant quantities of the H1N1 flu vaccine, in both the intranasal mist and shot forms, in the coming months.

Since we anticipate that the first several shipments of vaccine will not be sufficient to provide vaccine to all of the Frederick County public and private elementary schools at the same time, the order of schools to receive vaccine was randomly determined. To find out where your child's school is on the randomly ordered list to receive H1N1 influenza vaccine, review the list below. The random selection included all Frederick County public elementary schools, State elementary schools, and private schools that communicated an interest in conducting in-school vaccination clinics by the time the random selection process was conducted. Any additional schools that may express an interest in conducting in-school vaccination clinics will be placed at the end of the list.

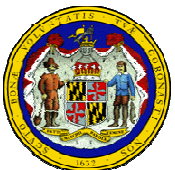

Due to the unpredictable vaccine shipment schedule and the time delay in sending out and returning of consent forms, parents/guardians will receive consent forms weeks in advance of the in-school vaccination clinics being scheduled. We will do our best to estimate when we will have enough vaccine to schedule the next school on the list and will communicate the estimated date to the schools.
