Newbridge Spine & Pain Center Opens in Frederick, MD

New Construction Complete; Patients Invited to State-of-the-Art Pain Management Facility at 196 Thomas Johnson Drive

FREDERICK, Maryland - Nov 15
Dr. Jay Gonchigar, MD, is proud to

JAY GONCHIGAR, MD

announce the opening of Newbridge Spine & Pain Center at 196 Thomas Johnson Drive in Frederick, MD.

"We are delighted to offer the Frederick community our compassionate

approach to treating pain," said Dr. Gonchigar, founder of Newbridge Spine & Pain Center. "The comfort of our patients is our top priority and the new facility enables us to make them feel at home while providing the highest quality of care."

Established in February 2009, Newbridge Spine & Pain Center is now located in a brand new 4,500 square-foot facility with multiple private examination rooms, designated patient education areas and an advanced state-of-the-art procedure suite.

Having served the Frederick community for more than 12 years providing

CARLTON W. MCCLELLAN, PA-C

comprehensive chronic pain management, Dr. Gonchigar believes every patient deserves undivided attention. "We take the time to listen to our patient's stories and understand their needs. Our team is dedicated

to creating effective, custom-tailored treatment plans," he added.

Dr. Gonchigar completed his medical training, including a fellowship in pain management, and held a faculty position at Beth Israel Deaconess Medical Center, an affiliate of Harvard Medical School, in Boston, MA, before moving to Maryland in 1996. He was a founding member of Capital Area Pain Management Associates in 1999, one of the first free-standing pain management clinics in the area.

"It's a pleasure to welcome patients to our new office because they receive efficient personalized attention every time," said Carlton W. McClellan, PA-C, a long-standing member of Dr. Gonchigar's team.

Dr. F. Craig Littlejohn, MD, after receiving medical training at New York Presbyterian Hospital in New York, NY, and UC Davis Medical Center in Sacramento, CA, relocated to Frederick, MD, to practice at Newbridge Spine & Pain Center.

F. CRAIG LITTLEJOHN, MD

"I'm pleased to be here, the facility is fully-equipped for individualized treatment and high-quality care." Dr. Littlejohn said, referring to the new location.

Offering non-interventional and interventional pain management services for the diagnosis and treatment of acute and chronic pain, Newbridge Spine & Pain Center welcomes patients five days a week, Monday through Friday, from 8:00 AM to 4:00 PM. For more information, please visit Newbridge Spine & Pain Center online at www.NewbridgeSpine.com.
